#### Pressure range

APC010C Vacuum to 10 psi / 0.7 bar APC030C Vacuum to 30 psi / 2 bar APC200C Vacuum to 200 psi / 15 bar APC500C Vacuum to 500 psi / 35 bar APC01KG 0 to 1,000 psi / 70 bar APC03KG 0 to 3,000 psi / 200 bar APC05KG 0 to 5,000 psi / 350 bar APC10KG 0 to 10,000 psi / 700 bar

#### **High accuracy**

 $\pm 0.04\%$  of reading  $\pm 0.01\%$  F.S. with no low range degradation in accuracy

#### Ideal for on-site use

Complete ready-to-use calibration systems in carrying case or as individual indicators

#### True field calibrator

Fully temperature compensated - same high accuracy in the lab and in the field

#### Save time - instant general view

Display both reference pressure and the device-under-test at the same time

#### **Transmitter scaling**

Calculation of % error of the device-undertest with user-defined scaling

#### Easy pressure switch test

Automatically records opening and closing point values on the display

#### Record min and max readings

Capture the min and max pressure readings for safety valve applications

#### **External Pressure Modules**

More than 60 different pressure modules, accuracy up to 0.01% F.S.

#### Complete marine program

Part of a complete program of marine approved temperature, pressure and signal calibrators; including temperature sensors See more at www.jofra.com

ISO 9001 Manufacturer

# **JOFRA™** APC Series

# Advanced Pressure

**Calibrator** 

Handheld pressure calibrator offering userfriendly features and superior performance

This remarkable calibrator features deadweight tester accuracy in a modern digital package. The APC is available as an indicator or in one of 6 test-ready systems that are complete and equipped to meet your pressure calibration needs.

You can use the APC in applliations from safety valve verification to pressure transmitter.

#### PRODUCT DESCRIPTION

The JOFRA APC calibrators are the latest in the new generation of AMETEK handheld pressure calibrators. This series was designed to meet high accuracy pressure calibration applications and to make your tasks easier. The APC offers features such as dual information display, 17 different pressure units, transmitter supply, scalable mA input for % error calculation, serial communications, and external pressure module capability. The accuracy of the APC calibrators is deadweight caliber throughout the range and is temperature compensated for operation in controlled or in process applications. This is a truly superior pressure calibrator.

The JOFRA APM series of pressure modules extends the application base for the APC calibrators by allowing for calibrations in ranges other than those of the indicator; and at a lower cost than purchasing another APC. The APM modules are also compatible with several other JOFRA calibrators.

You can perform a calibration locally without returning the APC unit to the manufacturer. All you need is an accurate pressure reference. If you do require factory calibration, the pump and indicator are independent and only the indicator needs to be returned.

#### **JOFRA APC INDICATOR**

#### Clear dual line display

Large digits display the pressure, icons show current status and mode, and the smaller digits show device-under-test conditions.

#### ON / OFF

Auto shut-off to extend battery life (user programmable).

#### mA / %

Save time and effort in calculating the error between the APC and the device-under-test by entering the pressure range corresponding to 4-20mA. This gives immediate read-out of the error in %.

You can also read mA or % of 4-20mA in the display.

#### **SWITCH TEST**

Perform semi-automatic pressure switch tests. The APC records the "close" and "open" pressure values and calculates the hysteresis (deadband). You change the pressure and the APC does the rest.

#### MAX/MIN

Reads the highest and lowest pressure value since you last reset the APC. Monitor a safety valve or look for pressure spikes in the process.

#### Pressure connections

1/8 in NPT female 200 psi (15 bar) and below. 1/8 in NPT male for 500 psi (35 bar) and above.

#### **Electrical connections**

The APC indicator have inputs for mA readings for pressure switches and transmitters, including 24 VDC supply, and for external JOFRA APM pressure modules.

# CALIBRATION INSTRUMENTS LOOPPWR LILILI LILI

MAXIM

IOFRA" APC

3000 PSI

#### UNITS Fasy ac

Easy access to 17 different pressure engineering units.

#### Serial interface

Serial interface to communicate with a PC (terminal). Also used if adjustment of the unit is necessary.

#### ZERO

Keep the high accuracy: ZERO the instrument before every test.

#### APM PRESSURE MODULES

The JOFRA APM series of pressure modules extends the application base for the APC calibrators by allowing for calibrations in ranges other than those of the indicator; and at a lower cost than purchasing another APC.

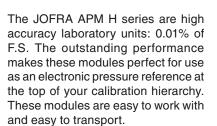

AMC900. These units are available in a series of ranges, units, and pressure references. From vacuum to absolute pressure, AMETEK has your application covered with the pressure modules to meet your calibration needs. There are different accuracies, ranges, and references designed to offer you the exact specifications you need for your pressure calibrations.

These rugged modules are engineered for in-plant, field, or laboratory use. They are ready-to-use with the JOFRA calibrators and the protocol allows for immediate recognition and use of the module once it is plugged into the calibrator. If you have pressure instrumentation, these modules are for you. When combined with the JOFRA calibrators and pump systems these modules make for a powerful arsenal of calibration tools. And, you can always add more as your needs change.

For use out-of-the-box any where in the world all units are supplied with a 1/4 in. NPT and a BSP female adapter.

Please see more about the APM series in specification sheet SS-CP-2190 at www.jofra.com

The JOFRA APM S series are industrial pressure modules with good accuracies up to  $\pm 0.05\%$  of F.S. The modules are designed so that the cable is integrated into the module housing, and the overall profile allows for easy storage of multiple modules.

AMETEK offers the user several solutions for pressure generation. This line spans from a small pneumatic "bicycle" type pump to a hydraulic pump that generates up to 15,000 psi / 1,000 bar. These are durable pumps with features such as vernier valves, vent valves, manifold connec-

tions, swivel fittings, and optional O-ring materials and fittings making the pumps flexible to meet your calibration and testing applications.

Please see more at www.jofra.com

#### **JOFRA APM module**

The JOFRA APM external pressure modules extend the range of the APC. There are more than 60 models available with gauge, absolute, differential, and vacuum pressure references and in metric and imperial engineering units.

#### **APC INDICATOR SPECIFICATIONS**

#### **Pressure range**

psi:	vacuum to 10, 30, 200, 500
bar:	vacuum to 0.7, 2, 15, 35
psi:	0 to 1,000, 3,000, 5,000, 10,000
bar:	0 to 70, 200, 350, 700

#### **Engineering units (built-in)**

#### **Pressure accuracy**

Pressure APC030C to APC10KG: ±0.04% rdg + 0.01% F.S
Pressure APC010C:
Full temperature compensation: 0 to 50°C / 32 to 122°F
Vacuum (10 psi / 0.7 bar indicator)±0.1% F.S
Vacuum (30, 200 psi / 2, 15 bar indicator)±0.05% F.S
Full temperature compensation: 10 to 45°C / 50 to 113°F

F.S. (full scale) is the numerical value of the postive pressure range. The accuracy includes non-linearity, hysteresis, repeatability and temperature effect 18 to  $28^{\circ}\text{C}$  / 64 to  $82^{\circ}\text{F}$ .

#### **Display**

LCD:	Dual line plus icons
Display resolution:	5 digits (see table on back page)
Display update:	twice per second

#### Input / output

mA range:	0 to 24 mA
mA accuracy:	±0.015% rdg +2 μA
Transmitter supply:	24 VDC
Peak hold capture:	50 milliseconds
Switch test input:	supply max. 9 VDC

#### RS232 communication interface

Connector:	Stereo jack
Serial: 0-5	VDC, 9600 baud, 8 data, no parity, 1 stop
Protocol:	ASCII command languag
Media compatibility.	Non corrosive gasses and liquids.

#### **Pressure connection**

Adapters to 1/4" NPT and BSP female are included as standard

#### Pressure overload

Overload:	+50%	F.S.
Overload alarm:	"OL" in display at +20%	F.S.

#### **Power supply**

Battery	1 x 9 VDC Alkaline
Battery life	.Minimum 20 hours
Battery life with APM module connected	. Minimum 10 hours
Low battery indicator	at 7 VDC

#### **Instrument dimensions**

Indicator L x W x H:7.9 x 3.2 x 3	2.1 in / 200 x 82 x 54 mm
Indicator weight (including battery): .	470 g / 17 oz
Indicator L x W x H, shipping:	45 x 567 x 45 in /
	333 x 888 x 444 mm
Indicator weight, shipping:	2.4 lb / 1.1 kg

#### Miscellaneous

CE Conformity	EN61326: 1998
DNV Marine Approval, Certificate no.:	A-9557

#### Useful soft case

The indicator is available separately and all APC units are supplied in a handy softcase.

The soft case that protects the instrument is engineered so that it becomes a useful part of the instrument. The soft case is designed for easy vertical operation so that when you open the case you will have easy access to all your test leads in the pocket. A flap in the top and an opening in the bottom provide access to the termination block and the pressure module connector. The soft case includes a shoulder strap for convenient transportation of the instrument when climbing ladders, etc.

At the back of this case you will also find a handy strap that fits your hand or makes it possible to hang the instrument on a pipe, ladder or the like while performing the calibration, test, or service task.

#### Complete aluminum carrying case

The APC is available as an indicator or in one of 6 test-ready systems that are complete and equipped to meet your pressure calibration needs.

The complete ready-to-use system is delivered in a practical aluminum carrying case.

#### **Advanced Pressure Calibration System A**

- 0 to 10 psi (0.7 bar)
- 0 to 30 psi (2 bar)
- 0 to 200 psi (15 bar)

This system includes the JOFRA APC calibrator together with one of the following pneumatic hand pumps: T-730 or T-740, depending on the chosen pressure range.

System A is an easy-to-use single hand operated calibration system. No need for a flat surface to operate the system - just hold it in your hand.

The System A comes in an aluminum carrying case with cutouts for fittings, hose, and the complete assembled calibration unit - no time is required to

assemble the unit every time you need it. The calibrator (indicator) can at any time be used separately for other pressure test tasks. A special quick connector between the pump and the indicator makes it possible to seperate the system in seconds and to swivel the indicator for easy viewing.

The JOFRA APC delivery always includes a protective soft-case for the indicator. All APC indicators used in System A are delivered calibrated in both pressure and vacuum. If a vacuum pump is required see below or APC System B.

#### T-700 series hand pumps

This hand pump is used in the APC System A. Three pump models are available, each covering a specific pressure range.

The pump features a built-in vent valve, a vernier valve for fine adjustment, and dual pressure output. There is an easy connection between the pump and the calibrator.

Pressure range, T-730	0 to 30 psi / 0 to 2 bar		
Pressure range, T-740	0 to 300 psi / 0 to 21 bar		
Pressure range, T-75025	to 0 inHg / -0.850 to 0 bar		
Test medium	Air		
Wetted parts: Aluminum, brass, stainless,steel, nylon, Nylatron GS			
Connections to test object 24 in /	0.6 m hose with 1/4" BSP		
and	NPT female terminations		

Part No.	Description
T 700	D 0 to 00

T-730 Pump: 0 to 30 psi (0 to 2 bar)
T-740 Pump: 0 to 300 psi (0 to 21 bar)
T-750 Pump: -25 to 0 inHg (-0.850 to 0 bar) 1)

1) Pump T-750 is not part of the system and has to be bought separately.

If used in an existing system remember to buy an extra replacement swivel fitting for pump (T-873)

#### For use with System A or standard pump connection:

11-90057 Fitting for APM-S pressure module 2)

1/4" NPT male to 1/4" NPT male

11-90067 Fitting for APM-H pressure module 2)

1/8" NPT male to 1/4" NPT male
Teflon tape is suggested with NPT fittings

2) Use standard 1/4" NPT female swivel fitting on pump

#### Standard delivery:

#### APC calibrator (indicator):

- Traceable calibration certificate (NIST)
- With pressure and vacuum performance
- 9V battery
- Adapter to 1/4" NPT female from 1/8" NPT
- Adapter to 1/4" BSP female from 1/8" NPT
- Test leads: red and black
- Soft case and shoulder strap
- User manual

#### Also included with System A delivery:

- Base model AXX: Pump T-730 for APC010 (10 psi / 0.7 bar)
- Base model AXX: Pump T-730 for APC030 (30 psi / 2 bar)
- Base model AXX: Pump T-740 for APC200 (200 psi / 15 bar)
- Base model AVX: Pump T-750 for

APC010 (10 psi / 0.7 bar) to APC200 (200 psi / 15 bar)

- Hose 24 in / 0.6 m with 1/4" BSP and NPT female connector
- Quick connector between pump and indicator
- 1 roll of teflon tape
- Aluminum carrying case
- Fitting to go from the quick connector on the indicator to 1/4" BSP or NPT female (when using the indicator as a gauge in the process)

#### Shipping information

Weight		12.13 lb / 5.5 kg
Size	7.4 x 13.8 x 22 in / 188	x 350 x 560 mm

#### **Accessories**

65R192

#### Part No. Description

Recommended fitting set for the system - to interface your deviceunder-test with the test hose:

65R191 Fitting set BSP female: 1x1/8" 1x3/8" 1x1/2"

teflon tape and packings (60R191)

Fitting set NPT female: 1x1/8" 1x1/4" 1x3/8"

1x1/2" teflon tape and packings (60R191)

60R191 Set of rubber packings for 65R191 and 65R192

60I104 Role of teflon tape

60R178 Fitting: From the quick connector to 1/4" BSP fem. 60R166 Fitting: From the quick connector to 1/4" NPT fem.

#### **Advanced Pressure Calibration System B**

- Vacuum to 200 psi (15 bar)
- Vacuum to 500 psi (35 bar)

This system includes the dual function pneumatic hand pump. With this pump you can calibrate both vacuum and pressure applications.

It takes just a few seconds to switch between vacuum and pressure, just push one button (valve) on the T-930 handpump.

The System B comes in an aluminum carrying case with cutouts for fittings, hose and the complete assembled calibration unit - no time required to assemble the unit every time.

The indicator and the pump are fitted with a special quick connector that makes it possible to separate the system in seconds without any tool. This quick connector also makes it possible to use the assembled system with the indicator twisted to any angle.

#### T-930 hand pump

The T-930 pump is an easy-to-use single hand-operated pneumatic pump. The T-930 pump features both vacuum and pressure generation up to 500 psi (35 bar).

One button (valve) makes it easy to switch from vacuum to pressure measurements. Built-in release valve, vernier valve for fine adjustment and dual pressure output enable safe and simple operation

Pressure range	14 psi to 500 psi / -0.95 to 35 bar
Test medium	Air
Wetted parts	. Anodized aluminum, nickel-plated brass,

- 0 to 500 psi (35 bar)
- 0 to 1,000 psi (70 bar)
- 0 to 3,000 psi (200 bar)
- 0 to 5,000 psi (350 bar)

This system consists of an APC calibrator together with a hydraulic, high pressure hand pump T-620 or T-620H, which features an oil reservoir to prime the system.

System C is an easy-to-use single hand-operated calibration system. No need for a flat surface (table) to operate the system. The system includes release valve and vernier valve for fine adjustment to enable safe and simple operation of the pump.

The System C comes in an aluminum

carrying case with cutouts for fittings, hose, and the complete assembled calibration unit - no time adder to assemble the unit every time. Easy and fast connection between pump and calibrator makes it easy to use the pressure indicator separately for other pressure test tasks.

#### AMETEK hydraulic hand pump with oil reservoir

This easy-to-use hand pump is specially designed for high pressure applications. The pump is used in the APC system C.

The pump has a 0.5 pint / 200 cl built-in oil reservoir, vent valve, and vernier valve for fine adjustment. The pump has a dual pressure output - one for the test object and one for the APC calibrator.

Pressure range, T-620	0 to 3,000 psi / 200 bar
Pressure range, T-620H	0 to 5,000 psi / 350 bar

#### **Advanced Pressure Calibration System D**

- 0 to 500 psi (35 bar)
- 0 to 1,000 psi (70 bar)
- 0 to 3,000 psi (200 bar)
- 0 to 5,000 psi (350 bar)

This system consists of an APC calibrator with a rugged, hydraulic, high pressure screw pump.

System D is an easy-to-use calibration system. Place the pump on a flat surface and turn the handle to generate pressure. You can adjust the indicator to fit the best viewing angle. The system includes a manifold for connection of the test

device, a fine adjustment vernier valve (optional), and a reservoir for extra oil or water (optional).

The System D comes in an aluminum carrying case with cutouts for fittings and the complete assembled calibration unit - no time adder to assemble the unit every time. Easy and fast connection between pump and calibrator makes it easy to use the pressure calibrator separately for other pressure test tasks.

#### **AMETEK screw pump**

The AMETEK screw pump is designed for very easy generation of high pressure.

This pump is part of system D. The screw pump has a 4 output manifold. Fine adjustment, vernier valve, liquid reservoir, and fittings are optional. The

AMETEK screw pump may be delivered for 2 different test media: hydraulic oil or water.

Pressure range	0 to 5,000 psi / 350 bar
Test media	Hydraulic oil, water
Wetted parts	Aluminum, brass, stainless steel
Connections to test objects:	4 x 1/4" BSP female

## Part No. Description

	Bonded seal is suggested with BSP fittings
	<ol><li>Both fittings are required for APM-H</li></ol>

#### For use with standard pump connections:

T-870	Fitting for APM-H pressure module <sup>2</sup> )
	1/8" NPT male to 1/4" BSP male
60R115	Fitting for APM-S pressure module 2) 3)
	1/4" BSP male to 1/4" BSP male
	Teflon tape is suggested with NPT fittings
	Bonded seal is suggested with BSP fittings
	2) Use standard 1/4" BSP male connections on pump 3) Use 1/4" BSP female adapter supplied with APM-S

#### Standard delivery:

#### APC calibrator (indicator):

- Traceable calibration certificate (NIST)
- 9 V battery
- Adapter to 1/4" NPT female from 1/8" NPT
- Adapter to 1/4" BSP female from 1/8" NPT
- Test leads: red and black
- Soft carrying case
- User manual

#### Also included with System D delivery:

- · Screw pump for oil or water
- 10 x 1/4" bonded seals, Allen key 6 mm
- 2 x 1/4" NPT female adapters
- 1 roll of teflon tape
- Aluminum carrying case

#### **Shipping information**

01	KG	0 to 1,000 psi (70 bar)
03	3KG	0 to 3,000 psi (200 bar)
05	KG	0 to 5,000 psi (350 bar)
		Base model number - 8th through 10th characters

DOX APC calibration System D - oil

DWX APC calibration System D - water

Certificate - 11th character
G NIST traceable certificate (standard)

H Accredited certificate

#### APC03KGDOXG Sample order number

JOFRA APC 3,000 psi (200 bar) pressure calibration System D screw pump for oil and NIST traceable calibration certificate.

#### **Advanced Pressure Calibration System E**

- 0 to 1,000 psi (70 bar)
- 0 to 3,000 psi (200 bar)
- 0 to 5,000 psi (350 bar)
- 0 to 10,000 psi (700 bar)

This system consists of an APC calibrator together with a rugged, hydraulic, high pressure pump.

System E is an easy-to-use calibration system. The hydraulic pump makes it very easy to prime the system. You can adjust the indicator to fit the best viewing angle. The system includes a manifold for connection of two test devices and the fine adjustment vernier valve is standard.

The System E comes in an aluminum carrying case with cutouts for fittings and the complete assembled calibration unit - no time adder to assemble the unit every time. Easy and fast connection between pump and calibrator makes it easy to use the pressure calibrator separately for other pressure test tasks.

#### AMETEK hydraulic pump for System E

The AMETEK hydraulic pump is designed for high pressure applications. The pump is used in the APC System E.

The pump has a 4 pressure output manifold. Fine adjustment vernier valve and fittings are optional.

Pressure range	0 to 10,000 psi / 700 bar
Test media	oil
Wetted parts	Aluminum, brass, stainless steel
Connections to test objects:	2 x 1/4" BSP female

Part No. Description

65-P014 Hydraulic pump for oil: 0 to 10,000 psi (700 bar) 1)

1) 15.22 oz (450 ml) reservoir

#### For use with System E:

11-90110	Fitting for APM-H pressure module 2)
	1/8" NPT female to 1/4" BSP female
12-90135	Fitting for APM-H pressure module 2)
	1/8" NPT male to 1/8" NPT male
T-786	Fitting for APM-S pressure module
	1/4" NPT male to 1/4" BSP male
	Teflon tape is suggested with NPT fittings
	Bonded seal is suggested with BSP fittings
	<ol><li>Both fittings are required for APM-H</li></ol>

#### For use with standard pump connections:

T-870 Fitting for APM-H pressure module 2)

1/8" NPT male to 1/4" BSP male

60R115 Fitting for APM-S pressure module 2) 3)

1/4" BSP male to 1/4" BSP male
Teflon tape is suggested with NPT fittings
Bonded seal is suggested with BSP fittings
2) Use standard 1/4" BSP male connections on pump
3) Use 1/4" BSP female adapter supplied with APM-S

#### Standard delivery:

#### APC calibrator (indicator):

- Traceable calibration certificate (NIST)
- 9 V battery
- Adapter to 1/4" NPT female from 1/8" NPT
- Adapter to 1/4" BSP female from 1/8" NPT
- Test leads: red and black
- Soft carrying case
- User manual

#### Also included with system E delivery:

- Hydraulic pump
- 10 x 1/4" bonded seals, Allen key 6 mm
- 2 x 1/4" NPT female adapters
- 1 roll of teflon tape
- · Aluminum carrying case
- Vernier valve for fine adjustment

#### Shipping information

Weight	28.7 lb / 13 kg
Size	9.1 x 17.3 x 29.5 in / 230 x 440 x 750 mm

#### **Advanced Pressure Calibration System F**

- 0 to 500 psi (35 bar)
- 0 to 1,000 psi (70 bar)
- 0 to 3,000 psi (200 bar)
- 0 to 5,000 psi (350 bar)
- 0 to 10,000 psi (700 bar)

System F is an easy-touse calibration system. The hydraulic pump makes it very easy to prime the system. The pump contains 75 in<sup>3</sup> / 1.23 I of liquid.

The system includes a manifold for connection of two test devices and the fine adjustment vernier valve is standard. The System F comes in a pro-

tective carrying case with cutouts for fittings. Easy and fast connection between pump and calibrator makes it easy to use the pressure calibrator separately for other pressure test tasks.

#### **AMETEK hydraulic pump for System F**

The type T pump is designed for high pressure applications up to 15,000 psi (1,000 bar).

The pump and system may be ordered with either oil or a water/alcohol mixture as the pressure medium. The pump is constructed of 300 series

stainless steel and Monel allowing for the use of other hydraulic media. There are three available seal packages for the system: Buna-N, Viton®, and EPT. <sup>1)</sup>

The Type T pump features a dual pressure output manifold, fine adjustment vernier valve, relief valve, and dual volume control for rapid pressure increase at lower pressures and easier pumping at higher pressures.

1) Customer must verify compatibility of seals and pump materials with pressure medium. Viton is a registered trademark.

Pressure range	0 to 15,000 psi / 1000 bar
Test media	Hydraulic oil, water, Skydrol
Wetted parts	Stainless steel, Monel
Connections to test objects	BSP fittings 1/4" and 1/2" female;
	NPT fittings 1/4" and 1/2" female

AMETEK BB ADFRAT APC

#### **AMETEK Calibration Instruments**

offers a complete range of calibration equipment for temperature, pressure, and signal - including calibration software.

#### **JOFRA Temperature standards**

Portable precision thermometer.
Dry-block and liquid bath calibrators:
4 series, with more than 20 models - featuring speed, portability, accuracy and advanced documenting functions with JOFRACAL temperature calibration software.

#### **JOFRA Pressure standards**

Convenient electronic systems ranging from -1 to 700 bar (25 inHg to 10,000 psi) - multiple choices of pressure ranges, pumps and accuracies, fully temperature- compensated for problem-free and accurate field use.

#### **JOFRA Signal calibration**

Process signal measurement and simulation for easy control loop calibration and measurement tasks - from handheld field instruments for multi or single signals to laboratory reference level bench top instruments.

#### **JOFRA / JF Marine Instruments**

A complete range of calibration equipment for temperature, pressure and signal, approved for marine use under the brand name JOFRA and JF Instruments.

#### FP temperature sensors

A complete range of temperature sensors for industrial and marine use.

...because calibration is a matter of confidence

AMETEK Calibration Instruments is one of the world's leading manufacturers and developers of calibration instruments for temperature, pressure and process signals as well as for temperature sensors both from a commercial and a technological point of view.
